

All therapists providing in-person visits follow NYS and CDC Safety Guidelines for businesses and healthcare. Below is an overview of what you can expect for in-person sessions:

- Your therapist monitors their health daily before beginning the workday. If any COVID symptoms exist, in-person sessions may be cancelled or sessions may be changed to tele-therapy
- All clinic locations adhere to hygiene and sanitation requirements from the Centers of Disease Control and Prevention, and the Department of Health. Regular cleaning and disinfection occurs before/after each therapy session.
- Each child participating in clinic therapy sessions will have individual baskets/objects specific to your child that are disinfected before/after use.
- Your therapist will meet you outside upon your arrival and ask whether you have any exposures or symptoms of COVID-19. We ask that you answer these questions fully and truthfully and that you will only keep your in-person therapy sessions if you, your family and your child are symptom free. Your child will have their temperature taken prior to entering. An adult may join their child in the therapy session as long as they are masked and if the therapy session is at our main office location or before/after center-based program times at our other locations.
- Please know if you, your child, or anyone in your household have symptoms of COVID-19 or have been exposed to anyone with a confirmed or possible diagnosis, the in-person sessions will be cancelled/rescheduled (as per CDC quarantine guidelines) or proceed using telehealth, to the extent possible.
- Your therapist and your child (over 2) will be asked to wear a mask. If your child is resistant to wearing a mask, please share that information with your therapist. In this scenario, your therapist may wear a shield as an extra form of precaution.
- Your therapist and your child will sanitize their hands at the beginning of the session and whenever necessary during the session.
